

## Amlite Flexible Braided Hoses

High quality stainless steel braided hoses for connection of pipework systems to submersible pumps, shear valves and dispensers.

- Stainless steel corrugated inner hose with braided outer layer giving maximum protection
- Flexible design allows pipe connection in tight spaces
- Full range of suitable end fittings available
- Fully pressure tested at point of manufacture

**Amlite's** flexible metallic braided hoses are designed to create a safe and simple connection for a variety of pipework systems. Typical applications include connection of pipework to submersible pumps, shear valves and fuel dispensers.

The hose construction comprise a corrugated stainless steel inner giving excellent flexibility coupled with stainless steel outer braid which further protects the hoses from leaks whilst maintaining maximum flow of fuels and liquids.

**Amlite's** hose range is bespoke manufactured to customer requirements and are available in a multitude of end fittings such as fixed male, swivel female, elbows and flanges. All standard thread types are available.

Ordering made easy - you tell us what you need, we will code it and quote it! Please get in touch at [info@amliteltd.com](mailto:info@amliteltd.com) for your specific requirements where we can help and advise.
